

# Motor Vehicle Accident Claims

Manage your MVA claims with the industry's most experienced and successful partner.

Does your patient access team know how to identify MVA-related injuries? Automobile-accident patients are often classified as self-pay—even when available insurance policies could pay 100% of billed charges.

## Why You Should Outsource Your MVA Claims

When other coverage is available, automobile insurance should still be primary, and it almost always pays higher rates than the alternatives.

### Common Barriers to MVA Reimbursement:

- Paper-driven, time-consuming processes
- Patient access team unable to gather all necessary information
- Extensive investigation required to discover multiple policies
- Working with insurance adjusters, plaintiff attorneys, and patient/patient's family
- Differing state laws
- Producing coordination of benefits for OHI

### The Aspiration Difference

Through our industry-leading MVA practice, our experts will pursue every avenue for reimbursement to ensure you get the most out of your claims. **This process involves:**

Investigation	Verification	Completion
We investigate accident claims to identify and collect payment that may be available across various insurance policies, such as automobile, motorcycle, homeowners, renters, recreation, business liability, or travel insurance.	If no coverage exists on these insurance types, we'll obtain written verification for coordination of benefits and will return accounts quickly to be billed.	If appropriate, we will file and manage hospital liens against pending liability settlements for uninsured patients until payment has been secured.

### Maximize Your MVA Reimbursement—When you partner with Aspiration, you get:

- Dedicated team to take on extensive workloads
- Complimentary legal services necessary to obtain payment
- Comprehensive patient access training to ensure proper screening
- Complete investigation into all potential coverage areas, including first-party automobile, medical payments, PIP, health insurance, and auto liability insurance
